#### BATCHING PROCESS

100% computer controlled for precise weights of all components in the mix design. This creates a more consistent product in color, weight, texture, etc.

#### MANUFACTURING PROCESS

Rockface is manufactured on state of the art machinery. This creates consistency and uniformity in color, texture, weights, sizing, and creates a flat product that lays better.

#### STRENGTH

Due to the manufacturing process and batching systems we can achieve nearly twice the PSI strength. Rockface averages over 11,000 psi.

#### PRODUCTION CAPACITY

Rockface production capacities can exceed 4000 pcs per day. No job is too big to supply product on time.

#### COLOR

Rockface is produced with two standard colors. Custom colors are easily achieved. We have the ability to match other masonry-colored products to create uniformity on existing projects and other products.

#### WIRE REINFORCEMENT

Rockface uses a proprietary wire design and is consistent in the placement of the reinforcement. Any exposed wire is near the bottom of the panels and is stainless steel.

#### WARRANTY

Rockface carries a 10-year limited warranty against manufacturing defects. Not only does K + R stand behind the product we also have a reliable manufacturing partner that is financially stable.

#### WATER REPELLENCY

Rockface has water repellent inhibitors as a standard in the mix design.

## OTHER CONCRETE PAVERS

#### BATCHING PROCESS

Most precast products do not have precise measurements of the individual products that go into the mix design. This can create inconsistency between production runs.

#### MANUFACTURING PROCESS

Precast dock panels are manually poured in place and left in a mold for 24 hours. Curing for a week required prior to use or transportation. Panels are often not flat creating a product that "rocks."

#### STRENGTH

Precast dock pads range from 4000-5000 psi. The products are not nearly as strong and therefore can experience a higher percentage of breakage.

#### PRODUCTION CAPACITY

Precast has limitations to capacities due to the number of molds required and manual labor.

#### COLOR

Color options are often not in the mix design. Inconsistency in production runs and limitations in the ability to match existing products are a factor.

#### WIRE REINFORCEMENT

Placement of wire is inconsistent and can leach toward the surface of the dock panel. There are no known producers using stainless steel in their products which can create rust leaching to the surface.

#### WARRANTY

Warranties range from one producer to the next. These manufacturers are often limited in the financial resources, and many have not been able to weather the burden of this issue.

#### WATER REPELLENCY

There are no known producers using a water repellent in the mix design of precast dock panels

## DURALIFE DECKING

ONLY DURALIFE GIVES HOMEOWNERS THE CHOICE TO SELECT THEIR FAVORITE COLOR AT THE PERFORMANCE AND PRICE LEVEL THEY DESIRE.

### 1. CHOOSE YOUR COMPOSITE DECKING COLOR

CHOOSE FROM A VARIETY OF VARIEGATED AND NON-VARIEGATED COLOR OPTIONS TO ACHIEVE YOUR DESIRED DECK AESTHETICS.

### 2. CHOOSE YOUR COMPOSITE DECKING PROFILE

CHOOSE ONE OR MORE DECK PROFILES TO MEET YOUR SPECIFIC NEEDS. ALL PROFILES ARE MADE FROM DURALIFE'S UNIQUE POLYPROPYLENE COMPOSITE.

---

## STEP 1: CHOOSE DECKING COLOR

DURALIFE HARDWOODS COMPOSITE DECKING OFFERS THE BEAUTY OF FINISHED HARDWOOD.

AVAILABLE IN FOUR WOOD TONES. DURALIFE HARDWOODS ARE ECO-FRIENDLY AND FEATURE A UNIQUE VARIEGATED COLOR AND WOOD GRAIN PATTERN FOR A NATURAL APPEARANCE.

DURALIFE LANDSCAPES ECO-FRIENDLY DECKING-AVAILABLE IN TWO EARTH TONES.

EASY TO MAINTAIN AND ENDURES THE TEST OF TIME.

---

## STEP 2: CHOOSE DECKING PROFILE

FOR YOUR PRIMARY DECKING SURFACE, CHOOSE MVP OR SIESTA COLLECTIONS FOR PERFORMANCE AND PRICE. USE STARTER AND SQUARE EDGE PROFILES FOR PERIMETERS, STAIRS, RAILING AND CUSTOM WORK. ALL FOUR PROFILES ARE MADE FROM DURALIFE'S UNIQUE POLYPROPYLENE & HARDWOOD COMPOSITE THAT IS MADE FROM UP TO 90% RECYCLED CONTENT AND OUTPERFORMS OTHER WOOD AND COMPOSITE DECKING PRODUCTS.

### SIESTA™ DECKING PROFILE

#### ULTIMATE PERFORMANCE

Premium quality decking for ultimate performance and durability. When the greatest performance is essential, choose Siesta Profile decking. Available in DuraLife® Landscapes™ and Hardwoods™ Collections. Rated as the top performing composite decking product by the most trusted consumer advocate publication in the U.S.

### MVP™ DECKING PROFILE

#### MAXIMUM VALUE

High performance decking at maximum value for your project. Made from the same durable composite material as DuraLife Siesta Profile decking. A premium look at an optimum value. DuraLife MVP is the perfect choice for value conscious homeowners looking for a great looking, low maintenance deck board at an affordable price.

### STARTER™ DECKING PROFILE

#### DECK PERIMETER & STAIR TREAD

Create a stunning border by trimming your deck with DuraLife Starter Decking. When using a “picture frame” installation technique, the Starter profile works together with Siesta and MVP profiles to hide the exposed edges of the deck boards to create a clean and professional appearance.

### SQ. EDGE™ DECKING PROFILE

#### RAILING TOP & CUSTOM

Create a sleek, integrated deck space by using The Square Edge deck board as the top surface of your DuraLife railing. You can also use the Square Edge profile for custom projects where having square edges is ideal. The Square Edge profile is available in Hardwood and Landscape colors.

---

## THE COOLTRAC™ ADVANTAGE

DuraLife composite decking has unmatched strength and durability. Under hot summer sun, DuraLife decking stays 18% cooler than traditional composite decking, keeping your bare feet happy and comfortable. For maximum safety, DuraLife decking is 136% more slip resistant when wet and 56% more slip resistant when dry than the competition.

## MADE FROM UP TO 90% RECYCLED MATERIALS

Manufactured using both post-industrial and post-consumer recycled content with a maximum recycled content of up to 90% by weight; no toxic chemicals or preservatives.

# LADDERS

## WETSTEPS® WELDED LADDER

- **ERGONOMIC DESIGN-** MAKES ENTERING AND EXITING THE WATER FROM ANY PLATFORM EFFORTLESS. A SAFE EXPERIENCE FOR ALL AGES.
- **DURABLE, LIGHTWEIGHT DESIGN-** EASY TO LIFT OUT FOR DRY STORAGE WITHOUT LOSING ANY DOCK SPACE.
- **HEAVY DUTY, FLIP MOUNT-** ALLOWS THE LADDER TO FLIP UP AND OUT OF THE WATER WITH EASE.
- **STAIRWAY DESIGN-** EXTRA WIDE WALKWAY, HIGH HANDRAIL AND NEAR 40° ANGLE GIVES THE SAME FEELING AS WALKING UP AND DOWN A STAIRWAY.
- **SUPERIOR QUALITY-** THE HIGHEST GRADE OF ALUMINUM AVAILABLE AND LATEST WELDING TECHNOLOGY CREATES QUALITY YOU WON'T FIND IN ANY OTHER DOCK LADDER.

### WETSTEPS® WELDED LADDER SPECIFICATIONS:

AVAILABLE IN 4-, 5- AND 6-STEP CONFIGURATION

STEPS: 24" WIDE & 6" DEEP

WEIGHT LIMIT: 500 LBS

- EASY INSTALL WITH K + R DOCK PLATE- **PAGE# 24**

## WET STEPS® FAQs

### HOW MUCH WEIGHT CAN EACH LADDER SUPPORT?

When mounted securely and properly to the dock/pier structure, the welded ladder can support 500 lbs. If assembled properly, the Bolt-Together can support 350 lbs.

### WHAT SIZE ARE THE STEPS?

Welded ladder- steps are 24" wide & 6" deep. Bolt together ladder- 20" wide & 6" deep.

### WHEN IN THE WATER, HOW DEEP WILL THE STEPS REACH?

WetSteps® ladders come out at an angle, the measurement from mounting surface to the bottom step (which is not designed to touch bottom) are approximately:

4 step 42"

5 step 52"

6 step 62"

7 step 72"

### HOW HEAVY ARE THE WETSTEPS®?

Constructed from aluminum, the WetSteps® are lightweight and considered to be manageable to lift out of the water. The approximate weight is 30-40 lbs depending upon the size. WetSteps are considerably lighter than steel or wooden ladders.

### WILL MY LADDER STAY LOOKING NEW?

Powder coating is available to help protect your ladder.

### CAN IT BE TAKEN OUT OF THE WATER FOR STORAGE?

Yes, it is recommended to take your ladder out of the water when not in use. Every WetStep® ladder comes with a pin lock to hold in place in case of heavy winds.

### CAN I LEAVE IT IN THE WATER WHEN NOT IN USE?

No. It is recommended to remove it from the water when not in use to prevent algae, barnacles, etc. from growing. This also prevents build-up which can make any step slippery as well as offer protection from discoloration.

### DOES IT RUST?

All metals oxidize; however, unlike other metals, aluminum performs extremely well in water. Please note: Aluminum will never rust, but if left untreated will discolor in water.

# WINCH RISER & FAIRLEAD

---

FAIRLEADS ALLOW FOR THE PLACEMENT OF WINCHES IN FRONT CORNERS OF SLIPS ON COMMERCIAL OR RESIDENTIAL DOCKS WHERE DOCKS MUST BE ANCHORED TO THE BOTTOM OF THE LAKE. THEY SPREAD THE LOAD OUT EVENLY FOR GREATER STRENGTH AND LESS STRESS ON THE SUBSTRUCTURE. WHEN USED IN CONJUNCTION WITH A WINCH RISER, FAIRLEADS ALLOW FOR EASY ACCESS OF INSTALLATION AND ADJUSTMENT WITH FLUCTUATING WATER LEVELS.

## OPTIONAL EQUIPMENT

### C-10 ADJUSTABLE THERMOSTAT

---

THE C-10 THERMOSTAT CONTROLLER IS AN INEXPENSIVE WAY TO CONTROL THE OPERATION OF YOUR DE-ICER. THE C-10 USES AN AIR TEMPERATURE THERMOSTAT TO TURN THE DE-ICER ON WHEN THE TEMPERATURE DROPS BELOW A SET POINT THAT YOU DECIDE. ONE C-10 CONTROLS ONE 120V DE-ICER.

*Note: Kasco's control panels are available only in 120V, 60Hz.*

### C-20 TIME AND TEMPERATURE DE-ICER CONTROL

---

THE C-20 TIME AND TEMPERATURE CONTROLLER ALLOWS YOU TO DETERMINE AT WHAT AIR TEMPERATURE AND TIME OF DAY THE DE-ICER TURNS ON BY USING BOTH AN AIR TEMPERATURE CONTROLLER AND TIMER CLOCK. ONE C-20 WILL CONTROL ONE 120V DE-ICER.

*Note: Kasco's control panels are available only in 120V, 60Hz.*

### SUSPENDED OPERATION

---

KASCO DE-ICERS COME COMPLETE FOR SUSPENDED OPERATION FROM A DOCK OR BOAT IN EITHER A VERTICAL OR ANGLED POSITION. AN ANGLED POSITION PRODUCES AN ELONGATED PATTERN OF AGITATED WATER, WHILE A VERTICAL POSITION PRODUCED A CIRCULAR PATTERN. EASILY ADJUST THE ANGLE OF SUSPENSION BY SIMPLY LOOPING ONE SUSPENSION ROPE BACK ONE OR TWO BARS ON THE PROPELLER CAGE.

## UNIVERSAL DOCK MOUNT

---

EASILY MOUNT AND POSITION YOUR DE-ICER UNIT ON A DOCK, PILING, OR OTHER WATER-FRONT PROPERTY WITH OUR UNIVERSAL DOCK MOUNT KIT. USING A 1 IN. DIAMETER STAINLESS STEEL PIPE\* AND ENGINEERING-GRADE COMPOSITE MOUNTING HARDWARE, THIS STURDY MOUNTING SYSTEM LETS YOU SEAMLESSLY ROTATE THE UNIT UNDER WATER AND CHANGE ITS ANGLE AND DEPTH.

*\*Special Order Item*

## INDUSTRIAL DOCK MOUNT

---

KASCO'S HEAVY-DUTY DOCK MOUNT IS MADE FROM CORROSION-RESISTANT STAINLESS STEEL MOUNTING HARDWARE ACCOMPANIED BY A STAINLESS STEEL PIPE (PIPE IS CUSTOMER SUPPLIED). THIS ALLOWS IT TO WITHSTAND THE DEMANDING ENVIRONMENTS OF INDUSTRIAL OR HARSH APPLICATIONS. UTILIZING ITS UNIQUE DESIGN, YOU CAN EASILY CHANGE THE DE-ICER'S ANGLE, DEPTH AND POSITION.
